Report of Water Commissioners of Lisbon Village District

In accordance with a vote of the District at a special meeting, the water commissioners purchased the water system and equipment and franchises of the Lisbon Water Works Co., for the value of stock at \$30,000, and assumed outstanding liabilities of the company amounting to \$13,800. The water rents due July 1st were turned over to the District after paying current charges, consisting of taxes, etc.

The commissioners purchased rights of way for the new ten inch main which has been constructed from the reservoir to the village, at a cost of \$650, and purchased the cottage and land at the outlet of the pond owned by Oscar Clark, for \$400. The purchase of the rights of way does away with the danger of flood from the brook, and the main as now laid should not be affected in any way by high water, and eliminates crossing the brook in two places.

A ten inch main has been laid from the reservoir to the foot of Savage Hill in place of the old eight inch main, and an eight inch main laid along Atwood and High streets nearly to the railroad crossing, in place of the old four inch main, which has increased the pressure at the bank in the vicinity of ten pounds. There is now an eight inch main from the foot of Savage Hill to the Union House, and sufficient pipe to lay an eight inch main from the Union House to the Bank block has been purchased and paid for by the District. This work will be completed in the spring.

The total outlay for the new mains as laid, the additional pipe purchased as above, rights of way, superintendent's salary, additional hydrants, collector's salary, etc., has been \$23,367.02.

The commissioners recommend that a larger pipe be installed on School street to the school house, in place of the old cement pipe which is not large enough to give adequate fire protection. They also recommend that the eight inch pipe be extended from the Bank block to the Lisbon Manufacturing Co. mill, and a six inch main be laid from near the railroad crossing to the new development of the Lisbon Improvement association land, as the latter territory is only served by an inch and a half pipe and there is no fire protection provided. These pipes, when laid, should materially reduce the insurance rates and furnish adequate fire protection. New hydrants have been installed at the foot of Savage hill and on Atwood street, and six large hydrants have been purchased by the commissioners for use in the Square as soon as the new pipe is laid in the spring.

In order to carry out this work and install the necessary pipes, the commissioners recommend that an additional bond or note issue of \$25,000 be voted at the District meeting, which with the unexpended portion of the \$75,000 already voted, and current income, should nearly take care of the necessary additions.
